### Device Schedule:

#### Intended Purpose as per the Instructions for Use:

The devices are implantable temporary non-resorbable membranes surgically placed between the soft tissue (gingiva) and the jawbone. The devices aid in the regenerative healing of bone defects in the jawbone by acting as a barrier for bacteria and soft tissue cells, and a space creator for new bone formation. The device can be placed simultaneously with dental implants. The implant can act as an additional support (either directly or indirectly) for the membrane. The devices are intended to be surgically removed when sufficient bone regeneration is achieved as judged by the treating clinician.

**Risk Classification:** Class IIb Implantable

**Type** (Codes as per (EU) 2017/2185): MDN 1103
